General Description

MAX1480BEPI is a half-duplex RS-485/RS-422 transceiver IC manufactured by Maxim Integrated. It is designed to facilitate communication between two different types of electrical circuits - RS-485 and RS-422.

Features

It operates over a wide range of supply voltages, from 4.75V to 5.25V.

It can operate at data rates of up to 250kbps.

It has a low standby current of just 1uA.

It provides thermal shutdown protection to prevent damage from overheating.

It has a wide common-mode voltage range, making it suitable for use in noisy environments.
