

AD7528JRZ

Data Sheet

<u>RFO</u>

Digital to Analogue Converter, 8 bit, 5.6 MSPS, Parallel, 5V to 15V, SOIC, 20 Pins

Manufacturers	Analog Devices, Inc	
Package/Case	SOIC-20	
Product Type	Data Conversion ICs	22222222222
RoHS	Pb-free Halide free	
Lifecycle		Images are for reference only

Please submit RFQ for AD7528JRZ or Email to us: sales@ovaga.com We will contact you in 12 hours.

General Description

The AD7528 is a monolithic dual 8-bit digital/analog converter featuring excellent DAC-to-DAC matching. It is available in skinny 0.3" wide 20-pin DIP's and in 20-terminal surface mount packages.

Separate on-chip latches are provided for each DAC to allow easy microprocessor interface.

Data is transferred into either of the two DAC data latches via a common 8-bit TTL/CMOS compatible input port.Control input DAC A/DAC B determines which DAC is to be loaded. The AD7528's load cycle is similar to the write cycle of a random access memory and the device is bus compatible with most 8-bit microprocessors, including 6800, 8080, 8085, Z80.

The device operates from a +5V to +15V power supply, dissipating only 20mW of power.

Both DAC's offer excellent four quadrant multiplication characteristics with a seperate reference input and feedback resistor for each DAC.

Features	Application
On-Chip Latches for Both DACs	Digital Control of:
DACs Matched to 1%	Gain/Attenuation
Four Quadrant Multiplication	Filter Parameters
TTL/CMOS Compatible	Stereo Audio Circuits
Latch Free (Protection Schottkys not Required)	X-Y Graphics
