General Description

ADM202EARW is a high-speed, dual-channel RS-232/V.28 transceiver manufactured by Analog Devices.

Features

- It operates from a single 5V power supply.
- It can handle data rates up to 460 kbps.
- It has two independent drivers and receivers, which enable two-way communication.
- It has a wide common-mode voltage range that allows it to be used in harsh industrial environments.
- It has built-in ESD protection that makes it suitable for robust applications.

Application

- It is widely used in industrial automation and control systems.
- It is used in point-of-sale systems and credit card terminals.
- It is used in instrumentation and measurement equipment.
- It is used in networking and telecommunications equipment.
