

Low Emission Isolated DC to DC Converter

Manufacturers	Analog Devices, Inc
Package/Case	8-Lead SOIC (Increased Creepage)
Product Type	Interface ICs
RoHS	
Lifecycle

General Description

The ADuM6028 is an isoPower®, integrated, isolated dc-to-dc converter. Based on the Analog Devices, Inc., iCoupler® technology, the dc-to-dc converter provide regulated, isolated power that is below CISPR22 Class B limits at full load on a 2-layer PCB with ferrites.

The ADuM6028 eliminates the need to design and build an isolated dc-to-dc converter in 300 mW applications. The iCoupler chip scale transformer technology is used for the magnetic components of the dc-to-dc converter. The result is a small form factor, isolated solution.

The ADuM6028 isolated dc-to-dc converters provide a space saving 8 pin wide body SOIC.

Features

isoPower integrated, isolated dc-to-dc converter

60 mA output current

Meets CISPR22 Class B Emissions limits at full load on a 2-layer PCB

8-lead SOIC package with 8.3 mm minimum creepage

High temperature operation: 125°C maximum

Safety and regulatory approvals

UL recognition (pending)

5000 V rms for 1 minute per UL 1577

CSA Component Acceptance Notice 5A (pending)

VDE certificate of conformity (pending)

VDE V>

CQC certification per GB4943.1-2011

Application

RS-485/RS-422/CAN transceiver power

Power supply start-up bias and gate drives

Isolated sensor interfaces
