General Description

XC9572-10PC44C is a programmable logic device (PLD) manufactured by Xilinx. It belongs to the XC9500 family of PLDs, which were widely used in the late 1990s and early 2000s.

Features

The XC9572-10PC44C has 72 macrocells, which can be configured as combinatorial or sequential logic.

It has a maximum operating frequency of 83 MHz.

It operates on a 5V power supply.

It has 44 pins and comes in a plastic dip package.

Application

The XC9572-10PC44C is commonly used in a wide range of digital logic applications, including computer peripherals, telecommunications, and industrial control systems.

It is also used in low-volume production runs of custom logic circuits.
